

# *Implement a new Ensemble Analysis*

*The BRAPH 2 Developers*

*December 24, 2024*

This is the developer tutorial for implementing a new ensemble analysis. In this tutorial, you will learn how to create a `*.gen.m` for a new ensemble analysis, which can then be compiled by `braph2genesis`. Here, you will use as examples the ensemble analysis `AnalyzeEnsemble_CON_BUD`, an ensemble-based graph analysis (`AnalyzeEnsemble`) analyzing connectivity data (CON) using binary undirected multigraphs with fixed densities (BUD).

## *Contents*

*Implementatoin of the ensemble analysis*      2

## Implementatoin of the ensemble analysis

You will implement in detail `AnalyzeEnsemble_CON_BUD`, a direct extension of `AnalyzeEnsemble`. An `AnalyzeEnsemble_CON_BUD` processes connectivity data to construct binary undirected graphs at fixed densities.

### Code 1: `AnalyzeEnsemble_CON_BUD` element

**header.** The header section of the generator code in `_AnalyzeEnsemble_CON_BUD.gen.m` provides the general information about the `AnalyzeEnsemble_CON_BUD` element.

---

```

1 %% iheader!
2 AnalyzeEnsemble_CON_BUD < AnalyzeEnsemble (a, graph analysis with
    connectivity data of fixed density) is an ensemble-based graph analysis
    using connectivity data of fixed density. ①
3
4 %%% idescription! ②
5 This ensemble-based graph analysis (AnalyzeEnsemble_CON_BUD) analyzes
6 connectivity data using binary undirected multigraphs with fixed densities.
7
8 %%% iseealso!

10
11 %%% ibuild! ③
12 1

```

---

① defines `AnalyzeEnsemble_CON_BUD` as a subclass of `AnalyzeEnsemble`. The moniker will be `a`.

② provides a description of this ensemble analysis.

③ defines the build number of the ensemble analysis element.

### Code 2: `AnalyzeEnsemble_CON_BUD` element prop up-

**date.** The `props_update` section of the generator code in `_AnalyzeEnsemble_CON_BUD.gen.m` updates the properties of the `AnalyzeEnsemble` element. This defines the core properties of the ensemble analysis.

---

```

47
48 %%%% iprop! ③
49 G_DICT (result, idict) is the graph (MultigraphBUD) ensemble obtained from
    this analysis.
50 %%%% isettings!
51 'MultigraphBUD'
52 %%%% icalculate!
53 g_dict = IndexedDictionary('IT_CLASS', 'MultigraphBUD');
54 gr = a.get('GR');
55 densities = a.get('DENSITIES'); ④
56
57 for i = 1:1:gr.get('SUB_DICT').get('LENGTH') ⑤
58     sub = gr.get('SUB_DICT').get('IT', i);
59     g = MultigraphBUD( ... ⑥
60         'ID', ['graph ' sub.get('ID')], ...
61         'B', sub.getCallback('CON'), ...
62         'DENSITIES', densities, ... ⑦
63         'LAYERLABELS', cellfun(@(x) [num2str(x) '%'], num2cell(densities), '
        UniformOutput', false), ...
64         'NODELABELS', a.get('GR').get('SUB_DICT').get('IT', 1).get('BA').get
        ('BR_DICT').get('KEYS') ...
65         );
66     g_dict.get('ADD', g) ⑧
67 end
68

```

① defines the property GR, which contains the subjects data using SubjectCON element, which are the subjects to be analyzed.

② Specifies the GRAPH\_TEMPLATE to define parameters such as DENSITIES, SEMIPOSITIVIZE\_RULE, and STANDARDIZE\_RULE. These settings are applied to all graphs in ④. Here, the graph element used is MultigraphBUD.

③ creates G\_DICT, a graph dictionary that contains instances of MultigraphBUD. These instances are derived from the subjects defined in ①.

④ retrieves the densities defined in the new properties below, which is used to configure the MultigraphBUD instances for the analysis.

⑤, ⑥, ⑦, and ⑧ collectively build the graph dictionary (G\_DICT). This process begins by iterating over each subject in GR, constructing an instance of MultigraphBUD for each subject based on their respective data, applying the specified DENSITIES parameter, and finally adding the created MultigraphBUD instances into the dictionary.

```

69 if ~isa(a.get('GRAPH_TEMPLATE'), 'NoValue')
70     for i = 1:1:g_dict.get('LENGTH')
71         g_dict.get('IT', i).set('TEMPLATE', a.get('GRAPH_TEMPLATE')) ⑨
72     end
73 end
74
75 value = g_dict;
76
77 %%% iprop!
78 ME_DICT (result, idict) contains the calculated measures of the graph
    ensemble.

```

⑨ ensures that all MultigraphBUD instances in the dictionary are updated with the pre-defined parameters from the graph template specified in ②, if explicitly set by the user during initialization of AnalyzeEnsemble\_CON\_BUD.

**Code 3: AnalyzeEnsemble\_CON\_BUD element props.** The props section of the generator code in \_AnalyzeEnsemble\_CON\_BUD.gen.m defines the properties to be used in AnalyzeEnsemble\_CON\_BUD.

```

1 %%% iprops!
2
3 %%% iprop!
4 DENSITIES (parameter, rvector) is the vector of densities.
5 %%% idefault!
6 [1:1:10]
7 %%% igui! ①
8 pr = PanelPropRVectorSmart('EL', a, 'PROP', AnalyzeEnsemble_CON_BUD.
    DENSITIES, ...
9     'MIN', 0, 'MAX', 100, ...
10    'DEFAULT', AnalyzeEnsemble_CON_BUD.getPropDefault('DENSITIES'), ...
11    varargin{:});
12 %%% ipostset!
13 a.memorize('GRAPH_TEMPLATE').set('DENSITIES', a.getCallback('DENSITIES'));

```

① PanelPropRVectorSmart plots the panel for a row vector with an edit field. Smart means that (almost) any MatLab expression leading to a correct row vector can be introduced in the edit field. Also, the value of the vector can be limited between some MIN and MAX.

**Code 4: AnalyzeEnsemble\_CON\_BUD element tests.** The tests section in the element generator \_AnalyzeEnsemble\_CON\_BUD.gen.m. A general test should be prepared for using the example script where the ensemble analysis is used. The test should also at least verify in some simple cases that the GUI function is working properly.

        CATEGORIES', {'Female', 'Male'}, 'V', randi(2, 1)))
83     gr2.get('SUB_DICT').get('ADD', sub)
84 end
85
86 a1 = AnalyzeEnsemble_CON_BUD('GR', gr1, 'DENSITIES', 5:5:20); (13)
87 a2 = AnalyzeEnsemble_CON_BUD('GR', gr2, 'TEMPLATE', a1); (14)
88
89 c = CompareEnsemble( ... (15)
90     'P', 10, ...
91     'A1', a1, ...
92     'A2', a2, ...
93     'WAITBAR', true, ...
94     'VERBOSE', false, ...
95     'MEMORIZE', true ...
96 );
97
98 gui = GUIElement('PE', c, 'CLOSEREQ', false); (16)
99 gui.get('DRAW') (17)
100 gui.get('SHOW') (18)
101
102 gui.get('CLOSE') (19)

```

(13) Similar to the previous test, this initializes the first AnalyzeEnsemble\_CON\_BUD with the specified gr and densities.

(14) Initializes the second AnalyzeEnsemble\_CON\_BUD using the first AnalyzeEnsemble\_CON\_BUD instance as a template. This setup allows the second instance to have its own gr data while applying the same parameters, specifically the densities.

(15) creates a CompareEnsemble instance with the defined AnalyzeEnsemble\_CON\_BUD instances.

(16), (17), (18), and (19) test creating, drawing, showing, and closing the GUI of the CompareEnsemble.
